Index of Subjects

Acid–base balance
Exercise, bone and nutrition
60, 265, 2001, DOI: 10.1079/PNS200085

Adipocytes
The adipose organ: morphological perspectives of adipose tissues
60, 319, 2001, DOI: 10.1079/PNS200192

Adipose organ
The adipose organ: morphological perspectives of adipose tissues
60, 319, 2001, DOI: 10.1079/PNS200192

Adipose tissue
The adipose organ: morphological perspectives of adipose tissues
60, 319, 2001, DOI: 10.1079/PNS200192

Pro-inflammatory cytokines and adipose tissue
60, 349, 2001, DOI: 10.1079/PNS2001110

Adipose tissue and the insulin resistance syndrome
60, 375, 2001, DOI: 10.1079/PNS200195

β-Adrenoceptors
The sympathetic nervous system in white adipose tissue regulation
60, 357, 2001, DOI: 10.1079/PNS2001101

Amino acid requirements
Methodological considerations
60, 3, 2001, DOI: 10.1079/PNS200064

Human protein requirement: policy issues
60, 7, 2001, DOI: 10.1079/PNS200065

The biology of amino acid requirements: what do they mean and can we measure them?
60, 13, 2001, DOI: 10.1079/PNS200066

Angiogenesis
A heliocentric view of leptin
60, 301, 2001, DOI: 10.1079/PNS200096

Antibiotic resistance
Development of antibiotic resistance and options to replace antimicrobials in animal diets
60, 291, 2001, DOI: 10.1079/PNS2001109

Antiretroviral drugs
Long-term changes in adipose tissue in human disease
60, 365, 2001, DOI: 10.1079/PNS200198

Appreciation
A personal appreciation, Dr Elsie M. Widdowson
60, 157, 2001, DOI: 10.1079/PNS200191

Bacteria
Development of antibiotic resistance and options to replace antimicrobials in animal diets
60, 291, 2001, DOI: 10.1079/PNS2001109

Balance studies
Methodological considerations
60, 3, 2001, DOI: 10.1079/PNS200064

Beef
Producing tender and flavoursome beef with enhanced nutritional characteristics
60, 221, 2001, DOI: 10.1079/PNS200077

Bioavailability
Microencapsulation: its application in nutrition
60, 475, 2001, DOI: 10.1079/PNS2001112

Bone mineral density
The relative contribution of diet and genotype to bone development
60, 45, 2001, DOI: 10.1079/PNS200072

Bone mineral mass
The relative contribution of diet and genotype to bone development
60, 45, 2001, DOI: 10.1079/PNS200072

Bone minerals
Exercise, bone and nutrition
60, 265, 2001, DOI: 10.1079/PNS200085

Bone resorption
Integrin antagonists as inhibitors of bone resorption: implications for treatment
60, 275, 2001, DOI: 10.1079/PNS200079

Bone turnover
Calcium turnover and nutrition through the life cycle
60, 283, 2001, DOI: 10.1079/PNS200082

Brown adipose tissue
The role of leptin in the transition from fetus to neonate
60, 187, 2001, DOI: 10.1079/PNS200086

Calcium
Calcium turnover and nutrition through the life cycle
60, 283, 2001, DOI: 10.1079/PNS200082

Cancer
Energy balance and cancer: the role of sex hormones
60, 81, 2001, DOI: 10.1079/PNS200068

Energy balance and cancer: the role of insulin and insulin-like growth factor-I
60, 91, 2001, DOI: 10.1079/PNS200070

Physical activity and cancer risk
60, 107, 2001, DOI: 10.1079/PNS200073

Candidate genes
The relative contribution of diet and genotype to bone development
60, 45, 2001, DOI: 10.1079/PNS200072

Carbohydrates
Development of antibiotic resistance and options to replace antimicrobials in animal diets
60, 291, 2001, DOI: 10.1079/PNS2001109

Cardiovascular disease
Plasminogen activator inhibitor-1 and haemostasis in obesity
60, 341, 2001, DOI: 10.1079/PNS200199

Changeable factors in milk
Producing specific milks for speciality cheeses
60, 231, 2001, DOI: 10.1079/PNS200080

Chemokine expression
Nutritional factors and immune functions of gut epithelium
60, 443, 2001, DOI: 10.1079/PNS2001122

Climate
Impact of climatic and other environmental changes on food production and population health in the coming decades
60, 195, 2001, DOI: 10.1079/PNS200090

Clinical governance
Strategic issues: the view from a community dietetic manager
60, 411, 2001, DOI: 10.1079/PNS2001104

Practical nutritional support: working together to make it happen
60, 415, 2001, DOI: 10.1079/PNS2001107

Clinical perspectives
Strategic issues: the view from a community dietetic manager
60, 411, 2001, DOI: 10.1079/PNS2001104

Clinical speciality
Human nutrition in medical practice: the training of doctors
60, 257, 2001, DOI: 10.1079/PNS200081

Cognitive function
A healthy body, a healthy mind: long-term impact of diet on mood and cognitive function
60, 135, 2001, DOI: 10.1079/PNS200061

Colo-rectal cancer
New food components and gastrointestinal health
60, 481, 2001, DOI: 10.1079/PNS2001106

Community nutrition support
Strategic issues: the view from a community dietetic manager
60, 411, 2001, DOI: 10.1079/PNS2001104

Consumer response
Technical constraints in the development of reduced-fat bakery products
60, 489, 2001, DOI: 10.1079/PNS2001108

Critical illness
Insulin resistance and glucose-induced thermogenesis in critical illness
60, 381, 2001, DOI: 10.1079/PNS200193

The evidence for glutamine use in the critically-ill
60, 403, 2001, DOI: 10.1079/PNS200197

Crohn's disease
Long-term changes in adipose tissue in human disease
60, 365, 2001, DOI: 10.1079/PNS200198

Modification of enteral diets in inflammatory bowel disease
60, 457, 2001, DOI: 10.1079/PNS2001120

Curriculum
Human nutrition in medical practice: the training of doctors
60, 257, 2001, DOI: 10.1079/PNS200081

Cytokine and antibody responses
Dietary fatty acid modulation of mucosally-induced tolerogenic immune responses
60, 449, 2001, DOI: 10.1079/PNS2001123

Cytokines
Physiological role of adipose tissue: white adipose tissue as an endocrine and secretory organ
60, 329, 2001, DOI: 10.1079/PNS200194

Pro-inflammatory cytokines and adipose tissue
60, 349, 2001, DOI: 10.1079/PNS2001110

Dairy cows
Lactation and gestation in dairy cows: flexibility avoids nutritional extremes
60, 527, 2001, DOI: 10.1079/PNS2001115

Dementia
Tube feeding patients with advanced dementia: an ethical dilemma
60, 179, 2001, DOI: 10.1079/PNS200083

Depression
A healthy body, a healthy mind: long-term impact of diet on mood and cognitive function
60, 135, 2001, DOI: 10.1079/PNS200061

Development
Nutrition–hormone receptor–gene interactions: implications for development and disease
60, 63, 2001, DOI: 10.1079/PNS200071

Regulation of mucosal immune responses in effector sites
60, 427, 2001, DOI: 10.1079/PNS2001118

Diet
New food components and gastrointestinal health
60, 481, 2001, DOI: 10.1079/PNS2001106

Dietary amino acids
The biology of amino acid requirements: what do they mean and can we measure them?
60, 13, 2001, DOI: 10.1079/PNS200066

Dietary behaviour
Pregnancy as a time for dietary change?
60, 497, 2001, DOI: 10.1079/PNS20001113

Dietary *n*-3 and *n*-6 fatty acids
Dietary fatty acid modulation of mucosally-induced tolerogenic immune responses
60, 449, 2001, DOI: 10.1079/PNS2001123

Dietary reference values
Human protein requirement: policy issues
60, 7, 2001, DOI:10.1079/PNS200065

Dietary risk factors
A healthy body, a healthy mind: long-term impact of diet on mood and cognitive function
60, 135, 2001, DOI: 10.1079/PNS200061

Dietetic perspectives
Strategic issues: the view from a community dietetic manager
60, 411, 2001, DOI: 10.1079/PNS2001104

Digestion constraint
Theoretical developments in the study and prediction of food intake
60, 145, 2001, DOI: 10.1079/PNS200062

Eating to requirements
Theoretical developments in the study and prediction of food intake
60, 145, 2001, DOI: 10.1079/PNS200062

Editorial
A new leaf
60, 1, 2001, DOI: 10.1079/PNS200063

Embryonic developmental defects
Genes, folate and homocysteine in embryonic development
60, 53, 2001, DOI: 10.1079/PNS200076

Energy balance
Energy balance and cancer: the role of sex hormones
60, 81, 2001, DOI: 10.1079/PNS200068

Energy balance and cancer: the role of insulin and insulin-like growth factor-I
60, 91, 2001, DOI: 10.1079/PNS200070

The regulation of body weight: lessons from the seasonal animal
60, 127, 2001, DOI: 10.1079/PNS200060

Lactation and gestation in dairy cows: flexibility avoids nutritional extremes
60, 527, 2001, DOI: 10.1079/PNS2001115

Enteral diet formulas
Modification of enteral diets in inflammatory bowel disease
60, 457, 2001, DOI: 10.1079/PNS2001120

Enteral nutrition
Enteral and parenteral nutrition: evidence-based approach
60, 399, 2001, DOI: 10.1079/PNS2001103

Environment
Impact of climatic and other environmental changes on food production and population health in the coming decades
60, 195, 2001, DOI: 10.1079/PNS200090

Epithelial barrier
How dietary antigens access the mucosal immune system
60, 419, 2001, DOI: 10.1079/PNS2001117

***Escherichia coli* O157:H7**
Dietary effects on the microbiological safety of food
60, 247, 2001, DOI: 10.1079/PNS200078

Ethics
Tube feeding patients with advanced dementia: an ethical dilemma
60, 179, 2001, DOI: 10.1079/PNS200083

Factor VII
Dietary monounsaturated fatty acids and haemostasis
60, 161, 2001, DOI: 10.1079/PNS200087

Fasting-induced adipose factor
Physiological role of adipose tissue: white adipose tissue as an endocrine and secretory organ
60, 329, 2001, DOI: 10.1079/PNS200194

Fat substitutes
Technical constraints in the development of reduced-fat bakery products
60, 489, 2001, DOI: 10.1079/PNS2001108

Fatty acids
Producing tender and flavoursome beef with enhanced nutritional characteristics
60, 221, 2001, DOI: 10.1079/PNS200077

Feeding behaviour
Consequences of genetic change in farm animals on food intake and feeding behaviour
60, 115, 2001, DOI: 10.1079/PNS200059

Fetal programming
Fetal programming of cardiovascular function through exposure to maternal undernutrition
60, 505, 2001, DOI: 10.1079/PNS20001111

Flavour
Producing tender and flavoursome beef with enhanced nutritional characteristics
60, 221, 2001, DOI: 10.1079/PNS200077

Folate
Genes, folate and homocysteine in embryonic development
60, 53, 2001, DOI: 10.1079/PNS200076

Food allergy
How dietary antigens access the mucosal immune system
60, 419, 2001, DOI: 10.1079/PNS2001117

Food antigens
How dietary antigens access the mucosal immune system
60, 419, 2001, DOI: 10.1079/PNS2001117

Food-borne pathogens
Dietary effects on the microbiological safety of food
60, 247, 2001, DOI: 10.1079/PNS200078

Food intake
Consequences of genetic change in farm animals on food intake and feeding behaviour
60, 115, 2001, DOI: 10.1079/PNS200059

Lactation and gestation in dairy cows: flexibility avoids nutritional extremes
60, 527, 2001, DOI: 10.1079/PNS2001115

Food intake model
Theoretical developments in the study and prediction of food intake
60, 145, 2001, DOI: 10.1079/PNS200062

Food labelling
Technical constraints in the development of reduced-fat bakery products
60, 489, 2001, DOI: 10.1079/PNS2001108

Food preservation
New processing technologies: an overview
60, 463, 2001, DOI: 10.1079/PNS2001105

Food processing
New processing technologies: an overview
60, 463, 2001, DOI: 10.1079/PNS2001105

Food production
Impact of climatic and other environmental changes on food production and population health in the coming decades
60, 195, 2001, DOI: 10.1079/PNS200090

Food safety
New processing technologies: an overview
60, 463, 2001, DOI: 10.1079/PNS2001105

Food security
Challenges for meeting the global food and nutrient needs in the new millennium
60, 15, 2001, DOI: 10.1079/PNS200075

Challenges to meet: food and nutrition security in the new millennium
60, 203, 2001, DOI: 10.1079/PNS200084

The impact of globalisation, free trade and technology on food and nutrition in the new millennium
60, 215, 2001, DOI: 10.1079/PNS200088

Food staples
Challenges to meet: food and nutrition security in the new millennium
60, 203, 2001, DOI: 10.1079/PNS200084

Functional foods
Microencapsulation: its application in nutrition
60, 475, 2001, DOI: 10.1079/PNS2001112

New food components and gastrointestinal health

Long-term changes in adipose tissue in human disease
60, 365, 2001, DOI: 10.1079/PNS200198

Homocysteine
Genes, folate and homocysteine in embryonic development
60, 53, 2001, DOI: 10.1079/PNS200076

Hormones
Nutrition–hormone receptor–gene interactions: implications for development and disease
60, 63, 2001, DOI: 10.1079/PNS200071

Hypertension
A heliocentric view of leptin
60, 301, 2001, DOI: 10.1079/PNS200196

Fetal programming of cardiovascular function through exposure to maternal undernutrition
60, 505, 2001, DOI: 10.1079/PNS20001111

Hypothalamus
The regulation of body weight: lessons from the seasonal animal
60, 127, 2001, DOI: 10.1079/PNS200060

Immune function
Nutritional modulation of immune function
60, 389, 2001, DOI: 10.1079/PNS2001102

The evidence for glutamine use in the critically-ill
60, 403, 2001, DOI: 10.1079/PNS200197

Immunity
Regulation of mucosal immune responses in effector sites
60, 427, 2001, DOI: 10.1079/PNS2001118

Immunity to parasites
Nutrient partitioning between reproductive and immune functions in animals
60, 515, 2001, DOI: 10.1079/PNS2001114

Immunological surveillance
Nutritional factors and immune functions of gut epithelium
60, 443, 2001, DOI: 10.1079/PNS2001122

Immunonutrition
Nutritional modulation of immune function
60, 389, 2001, DOI: 10.1079/PNS2001102

Inflammation
Modification of enteral diets in inflammatory bowel disease
60, 457, 2001, DOI: 10.1079/PNS2001120

Ingestion constraint
Theoretical developments in the study and prediction of food intake
60, 145, 2001, DOI: 10.1079/PNS200062

Insulin
Energy balance and cancer: the role of insulin and insulin-like growth factor-I
60, 91, 2001, DOI: 10.1079/PNS200070

Insulin-like growth factors
Energy balance and cancer: the role of insulin and insulin-like growth factor-I
60, 91, 2001, DOI: 10.1079/PNS200070

Insulin resistance
Plasminogen activator inhibitor-1 and haemostasis in obesity
60, 341, 2001, DOI: 10.1079/PNS200199

Insulin resistance and glucose-induced thermogenesis in critical illness
60, 381, 2001, DOI: 10.1079/PNS200193

Insulin resistance syndrome
Adipose tissue and the insulin resistance syndrome
60, 375, 2001, DOI: 10.1079/PNS200195

Integrin
Integrin antagonists as inhibitors of bone resorption: implications for treatment
60, 275, 2001, DOI: 10.1079/PNS200079

Intensive care
The evidence for glutamine use in the critically-ill
60, 403, 2001, DOI: 10.1079/PNS200197

Interleukin 6
Pro-inflammatory cytokines and adipose tissue
60, 349, 2001, DOI: 10.1079/PNS2001110

Intestinal absorption
How dietary antigens access the mucosal immune system
60, 419, 2001, DOI: 10.1079/PNS2001117

Intestinal epithelium
Nutritional factors and immune functions of gut epithelium
60, 443, 2001, DOI: 10.1079/PNS2001122

Intrauterine growth restriction
Nutrition–hormone receptor–gene interactions: implications for development and disease
60, 63, 2001, DOI: 10.1079/PNS200071

Iron
Iron deficiency and iron overload: effects of diet and genes
60, 73, 2001, DOI: 10.1079/PNS200069

Irritable bowel syndrome
New food components and gastrointestinal health
60, 481, 2001, DOI: 10.1079/PNS2001106

Lactation
Lactation and gestation in dairy cows: flexibility avoids nutritional extremes
60, 527, 2001, DOI: 10.1079/PNS2001115

Leptin
The role of leptin in the transition from fetus to neonate
60, 187, 2001, DOI: 10.1079/PNS200086

Physiological role of adipose tissue: white adipose tissue as an endocrine and secretory organ
60, 329, 2001, DOI: 10.1079/PNS200194

Pro-inflammatory cytokines and adipose tissue
60, 349, 2001, DOI: 10.1079/PNS2001110

The sympathetic nervous system in white adipose tissue regulation
60, 357, 2001, DOI: 10.1079/PNS2001101

Lipolysis
A heliocentric view of leptin
60, 301, 2001, DOI: 10.1079/PNS200196

Lutein
Nutritional factors and visual function in premature infants
60, 171, 2001, DOI: 10.1079/PNS200089

Macula
Nutritional factors and visual function in premature infants
60, 171, 2001, DOI: 10.1079/PNS200089

Malnutrition
Challenges for meeting the global food and nutrient needs in the new millennium
60, 15, 2001, DOI: 10.1079/PNS200075

Maternal nutrition
Pregnancy as a time for dietary change?
60, 497, 2001, DOI: 10.1079/PNS20001113

Melatonin
The regulation of body weight: lessons from the seasonal animal

Osteoporosis
The relative contribution of diet and genotype to bone development
60, 45, 2001, DOI: 10.1079/PNS200072

Exercise, bone and nutrition
60, 265, 2001, DOI: 10.1079/PNS200085

Integrin antagonists as inhibitors of bone resorption: implications for treatment
60, 275, 2001, DOI: 10.1079/PNS200079

Ovalbumin
Immunity induced after a feed of antigen during early life: oral tolerance *v.* sensitisation
60, 437, 2001, DOI: 10.1079/PNS2001119

Overnutrition
Challenges to meet: food and nutrition security in the new millennium
60, 203, 2001, DOI: 10.1079/PNS200084

PAI-1
Plasminogen activator inhibitor-1 and haemostasis in obesity
60, 341, 2001, DOI: 10.1079/PNS200199

Parasites
Development of antibiotic resistance and options to replace antimicrobials in animal diets
60, 291, 2001, DOI: 10.1079/PNS2001109

Parenteral glutamine
The evidence for glutamine use in the critically-ill
60, 403, 2001, DOI: 10.1079/PNS200197

PDO cheeses
Producing specific milks for speciality cheeses
60, 231, 2001, DOI: 10.1079/PNS200080

Perinodal adipocytes
Long-term changes in adipose tissue in human disease
60, 365, 2001, DOI: 10.1079/PNS200198

Physical activity
Physical activity and cancer risk
60, 107, 2001, DOI: 10.1079/PNS200073

Exercise, bone and nutrition
60, 265, 2001, DOI: 10.1079/PNS200085

Physiological (metabolic) phenotypes
Metabolism 2000: the emperor needs new clothes
60, 27, 2001, DOI: 10.1079/PNS200067

Pigs
Development of antibiotic resistance and options to replace antimicrobials in animal diets
60, 291, 2001, DOI: 10.1079/PNS2001109

Platelet aggregation
Dietary monounsaturated fatty acids and haemostasis
60, 161, 2001, DOI: 10.1079/PNS200087

Postgraduate
Human nutrition in medical practice: the training of doctors
60, 257, 2001, DOI: 10.1079/PNS200081

Pregnancy
Pregnancy as a time for dietary change?
60, 497, 2001, DOI: 10.1079/PNS20001113

Fetal programming of cardiovascular function through exposure to maternal undernutrition
60, 505, 2001, DOI: 10.1079/PNS20001111

Prematurity
Nutritional factors and visual function in premature infants
60, 171, 2001, DOI: 10.1079/PNS200089

Protein quality
Methodological considerations
60, 3, 2001, DOI: 10.1079/PNS200064

Protein requirements
Methodological considerations
60, 3, 2001, DOI: 10.1079/PNS200064

Human protein requirement: policy issues
60, 7, 2001, DOI:10.1079/PNS200065

Nutrient partitioning between reproductive and immune functions in animals
60, 515, 2001, DOI: 10.1079/PNS2001114

Recommended daily amounts
Human protein requirement: policy issues
60, 7, 2001, DOI:10.1079/PNS200065

Recommended dietary allowance
The biology of amino acid requirements: what do they mean and can we measure them?
60, 13, 2001, DOI: 10.1079/PNS200066

Reduced-fat bakery products
Technical constraints in the development of reduced-fat bakery products
60, 489, 2001, DOI: 10.1079/PNS2001108

Reproduction
A heliocentric view of leptin
60, 301, 2001, DOI: 10.1079/PNS200196

Resistin
Physiological role of adipose tissue: white adipose tissue as an endocrine and secretory organ
60, 329, 2001, DOI: 10.1079/PNS200194

Ruminant diet
Dietary effects on the microbiological safety of food
60, 247, 2001, DOI: 10.1079/PNS200078

Saturated fatty acids
Dietary monounsaturated fatty acids and haemostasis
60, 161, 2001, DOI: 10.1079/PNS200087

Sensitisation
Immunity induced after a feed of antigen during early life: oral tolerance *v.* sensitisation
60, 437, 2001, DOI: 10.1079/PNS2001119

Sex hormones
Energy balance and cancer: the role of sex hormones
60, 81, 2001, DOI: 10.1079/PNS200068

Shedding
Dietary effects on the microbiological safety of food
60, 247, 2001, DOI: 10.1079/PNS200078

Short-chain fatty acids
Nutritional factors and immune functions of gut epithelium
60, 443, 2001, DOI: 10.1079/PNS2001122

Single-nucleotide polymorphisms
Nutritional modulation of immune function
60, 389, 2001, DOI: 10.1079/PNS2001102

Stable isotopes
Calcium turnover and nutrition through the life cycle
60, 283, 2001, DOI: 10.1079/PNS200082

Sympathetic nervous system
The sympathetic nervous system in white adipose tissue regulation
60, 357, 2001, DOI: 10.1079/PNS2001101

Tenderness
Producing tender and flavoursome beef with enhanced nutritional characteristics
60, 221, 2001, DOI: 10.1079/PNS200077

Thrombosis
Plasminogen activator inhibitor-1 and haemostasis in obesity
60, 341, 2001, DOI: 10.1079/PNS200199

Tolerance
Regulation of mucosal immune responses in effector sites
60, 427, 2001, DOI: 10.1079/PNS2001118

Tolerogenic and antigenic immune responses
Dietary fatty acid modulation of mucosally-induced tolerogenic immune responses
60, 449, 2001, DOI: 10.1079/PNS2001123

Total parenteral nutrition
Enteral and parenteral nutrition: evidence-based approach
60, 399, 2001, DOI: 10.1079/PNS2001103

Tracers
Metabolism 2000: the emperor needs new clothes
60, 27, 2001, DOI: 10.1079/PNS200067

Triacylglycerols
Adipose tissue and the insulin resistance syndrome
60, 375, 2001, DOI: 10.1079/PNS200195

Tube feeding
Tube feeding patients with advanced dementia: an ethical dilemma
60, 179, 2001, DOI: 10.1079/PNS200083

Tumour necrosis factor α
Pro-inflammatory cytokines and adipose tissue
60, 349, 2001, DOI: 10.1079/PNS2001110

Twenty-first century
Impact of climatic and other environmental changes on food production and population health in the coming decades
60, 195, 2001, DOI: 10.1079/PNS200090

Uncoupling protein
The role of leptin in the transition from fetus to neonate
60, 187, 2001, DOI: 10.1079/PNS200086

Undergraduate
Human nutrition in medical practice: the training of doctors
60, 257, 2001, DOI: 10.1079/PNS200081

Undernutrition
Challenges to meet: food and nutrition security in the new millennium
60, 203, 2001, DOI: 10.1079/PNS200084

Vascular disease
A healthy body, a healthy mind: long-term impact of diet on mood and cognitive function
60, 135, 2001, DOI: 10.1079/PNS200061

Vitamin D
Exercise, bone and nutrition
60, 265, 2001, DOI: 10.1079/PNS200085

Weaning
Regulation of mucosal immune responses in effector sites
60, 427, 2001, DOI: 10.1079/PNS2001118

White adipose tissue
The sympathetic nervous system in white adipose tissue regulation
60, 357, 2001, DOI: 10.1079/PNS2001101

Zeaxanthin
Nutritional factors and visual function in premature infants
60, 171, 2001, DOI: 10.1079/PNS200089
